DETAILED ACTION

Double Patenting

1. Claim 2 of this application conflict with claim 1 of Application No. 10/814,865. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

Claim 2 is provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of copending Application No.10/814,865. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102 (b) as being anticipated by Stevens (US 5,370,685).

Steven disclose endovascular heart procedure having the limitations as recited in the above listed claim, including: a pair of cooperating cutting elements 40, where one of the cutting elements being rotatably coupled to the other of the pair of cutting elements (see col. 6, lines 57-60), where a holder 35 coupled to one of the cutting elements. Regarding the intended use of "a holder coupled to one of the cutting elements and adapted to receive the cut leaflets and the

cutting elements and holder being configured for delivery to the aortic valve leaflets through an aortotomy formed in the patient's aorta": The statement of intended use and other functional statements have been carefully considered but are deemed not to impose any structure limitations on the claims distinguishable over Steven reference which is capable of being used as claimed if one desires to do so.

Conclusion
